SUBJECT INDEX TO VOLUME 58

Adducts, quantification of cisplatin-DNA, 177
Adenosine 5'-diphosphate, speciation in systems containing aluminum^3, fluoride, and, 29
Albumin, human serum, tetra-μ-acetatodirhodium(II) interaction with, 69
Alkaline phosphatase, reaction with inositol hexaphosphate, 89
Aluminum^3, speciation in systems containing adenosine 5'-diphosphate, fluoride, and, 29
Ammonium bicarbonate, bifunctional cisplatin-DNA adducts and, 177
Anemia, iron deficiency, ferrous hemantinics and, 291
Anthraquinone complexes, platinum-, 79
Antimicrobial activities, thiosalicyclic acid ligand and, 255
Antitumor activity, platinum-anthraquinone complexes, 79
Bacterial DNA-dependent RNA polymerase, model compounds for zinc sites in, 245
Bis(thiosemicarbazones), zinc chloride, acetate, or perchlorate reaction with, 157
Calcium, hydroxylapatite structure and, 49
Carnosine, spectroscopic, magnetic, and electrochemical behavior of copper(II) complex of, 279
Cationic isoenzyme, preparation and characterization of major, 109
Cell proliferation and differentiation, zinc complexes and, 157
Circular dichroism spectra, metallothionein and platinum complexes from *cis*- and *trans*- diamminedichloroplatinum and, 9
cis-Dichlorodiammineplatinum, metallothionen and platinum complexes from, 9
cis-Dichlorodiammineplatinum(II), interaction with metallothionen, 1
Cisplatin-DNA adducts, quantification in cellular DNA, 177
Copper(II), complex formation between hippuryl-L-histidyl-L-leucine (H_2L^-) and, 139
Copper(II) complex of carnosine, spectroscopic, magnetic, and electrochemical behavior of, 279
Copper(II)-tetraanhydroaminobenzaldehyde (TAAB) complex, superoxide dismutase mimetic activity of macrocyclic, 297
Crystallization, zinc and hydroxylapatite, 49
Cupric(II), L-3,4-dihydroxyphenylalanine (L-DOPA) complex with nickel(II) and, 147
Cytochrome *c*, interaction with $[Pt\text{-}dien]^{2+}$, 21
2,6-Diacetylpyridine bis(thiosemicarbazones) zinc complexes, synthesis, structure, and biological activity, 157
L-3,4-Dihydroxyphenylalanine (L-DOPA) complex, cupric(II)- and nickel(II), 147
DNA, adduct quantification in cellular, 177
Enolase, Ni^{2+} interactions with yeast, 209
Ferricytochrome *c*, $[Pt\text{-}dien]^{2+}$ and, 21
Ferritins, manganese oxide core reconstituted, 59
Ferrous fumarate, Mössbauer and X-ray powder diffraction study, 291
Ferrous gluconate, Mössbauer and X-ray powder diffraction study, 291
Ferrous hemantinics, iron deficiency anemia and, 291
Ferrous sulfate, Mössbauer and X-ray powder diffraction study, 291
Fluoride, speciation in systems containing aluminum^3, adenosine 5'-diphosphate, and, 29
G-protein systems, speciation in systems containing adenosine 5'-diphosphate, aluminum^3, and fluoride and, 29
Hippuryl-L-histidyl-L-leucine (H_2L^-), complex formation between copper(II) and, 139
Human serum albumin, tetra-μ-acetatodirhodium(II) interaction with, 69
Hydroxylapatite crystallization, zinc effect on, 49
Inositol hexaphosphate, alkaline phosphatase reaction with, 89
2-*p*-iodophenyl-3-*p*-nitrophenyl-5-phenyltetrazolum chloride (INT), biomimetic redox with NADH and, 193
Iron
  lactoperoxidase iron(III)-heme catalytic site, 109
  manganese oxide core reconstituted ferritins, 59
Iron complex, recharacterization of polysaccharide, 269
Iron deficiency anemia, ferrous hemantinics and, 291
Iron(II), light-harvesting complex of thylakoid membranes and, 223
Iron(III)
  interaction with polysaccharides, 129
  light-harvesting complex of thylakoid membranes and, 223
Iron(III)-polysaccharide solutions, rod-like iron(III) oxyhydroxide particles in, 129
Lactoperoxidase iron(III)-heme catalytic site, spectroscopic investigations on, 109
Light-harvesting complex of thylakoid membranes, metal ions and, 223
Magnesium, in Ni^{2+} interactions with yeast enolase, 209
Manganese oxide cores, reconstitution of, 59
Mercury(II), light-harvesting complex of thylakoid membranes and, 223
Metal ions, light-harvesting complex of thylakoid membranes and, 223
Metal ions exchange, myo-inositol hexaphosphate and, 89
Metallothionein
  platinum binding to, 9
  platinum(II) complexes in biosynthesis of, 1
Myo-inositol hexaphosphate, alkaline phosphatase reaction with, 89
NADH, tetrazolium reduction in aqueous micellar solutions by, 193
Nickel complex, interactions with yeast enolase, 209
Nickel(II), L-3,4-dihydroxyphenylalanine (L-DOPA) complex with cupric(II) and, 147
Niferex, recharacterization, 269
Peptides, complex formation between hippuryl-L-histidyl-L-leucine (H_2L^-) and copper(II), 139
Platinum, binding to metallothionein, 9
Platinum-anthraquinone complexes, preparation, characterization, antitumor properties of, 79
Platinum(II) complexes, biosynthesis of metallothionein and, 1
Poly-L-lysine, L-3,4-dihydroxyphenylalanine (L-DOPA) oxidation with copper(II) and, 147
Polymeric, anionic thiosalicylato-Ag(I) complexes, synthesis and characterization, 255
Polysaccharide iron complex, recharacterization, 269
Polysaccharides, iron(III) and, 129
Proteins, coordination properties of internal chains of, 139
$[Pt\text{-}dien]^{2+}$, interaction with cytochrome *c*, 21
Rhodium complex, interaction with human serum albumin, 69
RNA polymerase, model compounds for zinc sites in, 245
Superoxide dismutase activity, copper(II) complex with tetraazamacrocyclic ligand, 297
Superoxide dismutase (SOD) activity, copper(II) complex of carnosine, 279
Tetra-μ-acetatodirhodium(II), interaction with human serum albumin, 69
Tetraazamacrocyclic ligand, superoxide dismutase mimetic activity of copper(II) complex with, 297
Tetrazolium, reduction by NADH in aqueous micellar solutions, 193
Thiosalicyclic acid ligand, synthesis and characterization, 255

Thiourea, bifunctional cisplatin-DNA adducts and, 177
Thylakoid membranes, metal ions and light-harvesting complex of, 223
trans-Dichlorodiammineplatinum, metallothionen and platinum complexes from, 9
trans-Dichlorodiammineplatinum(II), interaction with metallothionen, 1
Triton X-100, tetrazolium salts and, 193
Yeast enolase, Ni^{2+} interactions with, 209
Zinc
  hydroxylapatite crystallization and, 49
  in Ni^{2+} interactions with yeast enolase, 209
  RNA polymerase and model compounds for, 245
Zinc complexes
  cell proliferation and differentiation and, 157
  2,6-diacetylpyridine bis(thiosemicarbazones), 157
Zinc ions, myo-inositol hexaphosphate reactions and, 89
